

“...Let us run with patience the race that is set before us.” Hebrews 12:1

by Eric S. Hadik

5760 - CYCLE OF TIME UPDATES

A CYCLE OF TIME REPORT

5760:

Cycle of Time Updates

INSIIDE Track Reprint

“This is the word of the Lord concerning Israel. The Lord, who stretches out the heavens, who lays the foundation of the earth, and who forms the spirit of man within him, declares: ‘I am going to make Jerusalem a cup that sends all the surrounding peoples reeling.

Judah will be besieged as well as Jerusalem. On that day, when all the nations of the earth are gathered against her, I will make Jerusalem an immovable rock for all the nations. All who try to move it will injure themselves...Jerusalem will remain intact in her place ...On that day the Lord will shield those who live in Jerusalem, so that the feeblest among them will be like David, and the house of David will be like God, like the angel of the Lord going before them. On that day, I will set out to destroy all the nations that attack Jerusalem”

Zechariah 12:1-9 (New Int’l Version ©1986)

The original **Cycle of Time** Report details why the Jewish Year of 5760 culminates an abundance of long-term cycles (including an exact 7 periods of 360-years since the Biblical prophecy in the book of Daniel that described ‘Daniel’s 70 Weeks’ and the culminating ‘week of years’).

Sept. 1999 - Sept. 2000 is the year 5760 and is expected to complete MAJOR cycles of time and usher in many dramatic events during the first year (Sept. 2000 - Sept. 2001), the first 7 years (until Sept. 2007) and the first 12 years (into Sept. 2012... which coincides with the oft-cited Mayan Calendar reaching fruition). The following are some recent excerpts elaborating on our analysis...

5760... The Cycle of Time **The Transition Has Just Begun...**

2-29-00 - As most of you realize, I place a great deal of emphasis on the events in Israel and their perceived and potential impact on the US and the world at large. It would be easy to argue that the fate of such a tiny nation should have little bearing on the entire world, but the Bible has conveyed exactly the opposite of that thinking for 3,000+ years. And, if judged objectively, most observers would have to conclude that the Bible’s analysis has been accurate.

Whether it has been one madman's attempt at annihilating the Jewish race 60 years ago or the Arab world's persistent claim - and attempt to bring to pass - that Israel has no right to exist, the ramifications have had a profound impact on the entire world. In the ***Cycle of Time V*** (which I will be updating and reprinting in the near future), I described why I thought that the Jewish Year 5760 would be the fulfillment of multi-century cycles and would usher in great changes in the Middle East. The deadlines that Ehud Barak has placed on himself and Israel have reinforced this conclusion.

In that report, I also described the unique sequence of cycles that links 1917 (the liberation of Jerusalem), 1945 (the end of WWII and the beginning of a 3-year period that led to the declaration of the State of Israel), 1973 (the Yom Kippur War and related oil embargo on America for supporting Israel) **and the coming year 2001**. Each of these events are 28 years apart (4 x 7) and encompass a complete 84-year period (7 x 12 or completion x completion).

I also described why the year 5760 was a perfect fulfillment of a 360-year cycle (360 x 16 = 5760) that pinpointed many critical events in Israel's history... including Daniel's dream regarding the future of Israel and of all world empires. **The Year 5761 will be equally important as it BEGINS a new 7-year, 12-year, 19-year & 360-year period.**

There are many reasons to revisit this topic now, but one of them is a fascinating quote I recently read in late-1999. It quotes a Jewish rabbi and deals with the contrasting civil year as opposed to religious year in Israel (I have also discussed the two of these in detail in the past.)

Whether 5760 is attributed as having begun in September 1999 (Rosh Hashanah of the Jewish New Year) or in the coming month (as the following quote suggests) is not the important issue. What is the intriguing aspect is this precise reinforcement - from a very diverse source - to my theory that 5760 is such a critical year. Here is the quote:

"The Jubilee Year of 5760 begins at sundown on March 21, 2000 CE. "The days of man are the measure of the Miqvah." [The Miqvah is the Jewish Baptistry]. The measure of a Miqvah is 40 Sheahs. One Sheah is 12 dozen or 144 eggs. The Kabbalists liken one 12-month elliptic orbit of the Earth around the Sun as one egg of time. Hence, 144 x 40 = 5,760. That Jubilee year of 5760 begins on March 21-22, 2000. That is also Purim. "The days of man are the measure of the Miqvah."

Researcher Newsletter - December 1999

So, according to this belief - that has been held for centuries - the 'days of man' have a strong correlation to the 'measure of the Miqvah'.

...As new scandals hit Mr. Barak's administration, Palestinian negotiations founder, Syrian demands for a Golan withdrawal heighten and Crude oil prices attack levels where they threaten to derail the US and global economy - the focus on Israel and the Middle East is destined to intensify in the coming months.

Is it any surprise that Mr. Barak's deadline for Palestinian peace - and now Mr. Arafat's assured time frame for unilaterally declaring a Palestinian state - converge at the precise transition between 5760 & 5761... in September, 2000?!

What Americans do not realize is that the noose is being slowly tightened - thanks to the entire Arab World - around America's neck. The price of Crude Oil is a tax on everything we consume. If you do not believe this, name 5 things that you use, eat or need in any given day that do NOT have to be shipped in order for you to obtain them.

America has long been the wild card in Middle East politics and the Arab world - as well as Russia and now even the EU - have sought to minimize her influence. This is slowly being

accomplished and could be used in an extortionary manner just before a critical election in the US. For now, keep in mind the following quote from last month:

*"The stock market usually discounts troubles 3-6 months, sometimes 6-12 months, in advance. **My cycles pinpointed January 3rd as a major cycle peak in the S+P and January 17-19th as a major cycle peak in the DJIA. The S+P topped on January 3rd and the DJIA on January 14th.***

Both are already approaching their intra-year (that's year, not month or quarter as might normally be the case) projected support. If they have already been able to accomplish a 'normal' year's worth of selling - in a few weeks or less - what does this mean if these key support levels are broken?

*Get the picture? **The trouble has been forecast to BEGIN in the year 2000 and stretch into 2001.** We are only leaving the starting gates...The bottom line is we are ushering in a period of potential earth changes, celestial/planetary changes, multi-millennial Middle East cycles, multi-generational Russian cycles & multi-decade stock market cycles....The real issues are only beginning to materialize." IT*

Copyright 2/29/00 (March 2000) INSIIDE Track Newsletter

"...I am against you, O Gog, chief prince of Meshech and Tubal...In future years you will invade a land that has recovered from war, whose people were gathered from many nations to the mountains of Israel, brought out from the nations, and now all of them live in safety. You and all your troops and the many nations with you will go up, advancing like a storm; you will be like a cloud covering the land"

*Ezekiel 38:3b, 8-9
(New Int'l Version ©1986)*

"The Lord had said to Abram, "Leave your country, your people and your father's household and go to the land I will show you. I will make you into a great nation and I will bless you; I will make your name great, and you will be a blessing. I will bless those that bless you, and whoever curses you I will curse; and all the peoples on earth will be blessed through you."

*Genesis 12:1-3
(New Int'l Version ©1986)*

5760... The Cycle of Time

The Transition Continues...

3-29-00 - *"Whoever doesn't like it can drink the water of the Dead Sea!"* This early-March quote from Yasser Arafat reiterated Palestinian plans to declare statehood by September 2000. **This will come at the 7-year point of the Oslo Peace Accord - marking a time of 'completion' and of a new cycle in Middle East developments.**

It will also perfectly coincide with the transition of major cycles from 5760 - 5761; the beginning of a new 360-year cycle in Israel.

...What will the US sacrifice in exchange for a temporary cessation of tensions in the Middle East? How will the Arab world (still set on the destruction of Israel) respond if the US appears to be disproportionately favoring Israel? How long will it take before enough OPEC nations unite to destroy the economy of the US by pushing oil up to \$40.00 and beyond?

Many OPEC nations resent the US 'strong-arm' tactics in influencing this week's meeting. It only

took a couple weeks of oil above \$30.00/bbl in 1990/1991 to create a recession and knock out a US president. In 1973-1974, the Arab World was able to create a US stock market crash of over 40% with an oil embargo (coinciding with the hasty exit of a US president). In 1979-1980, they doomed a US president and contributed to the biggest surge in inflation and the largest increase in US interest rates with a second oil 'shortage'.

So, why does anyone believe that *'things are different now'*. Let's see... the early '70's, early '80's and early '90's each saw sharp stock market corrections, dramatic rises in the price of crude, slowdowns or all-out recessions in the US economy, and the demise of US presidents. Could the early '00's see the same? If so, will it come now or later?

...This brings me back to two cyclic conclusions drawn by two separate (unknown to each other) individuals regarding the exact same thing:

The year of 5760 marks a MAJOR cyclic rollover for Israel, the Middle East and the US role in global politics. The first was conveyed in the Cycle of Time V (and its prequels) that 5760 represented the culmination of decade-, century- and millennial-related cycles and would mark a critical turning point for Israel.

The second was given last month and discussed a Kabbalist belief that the days of man were the *'measure of the Miqvah'* and would see culmination (or perhaps important transition) in 5760.

The Year 5760 culminates in Sept. 2000 and will be a major turning point. The ensuing year of 5761 begins a new chapter in Middle East history, coinciding with unique earthquake/ volcano cycles I have discussed for several years. As conveyed in January, April 2000 is another precarious time in the earth for Japan, the Western U.S. and other high-risk areas around the globe. It could be a precursor to 2001!

2001 also completes the 28- and 84-year cycles that have impacted Israel (& Russia) since the early-1900's. There is also an intriguing religious (Christian & Jewish) cycle reaching fruition in September 2001 that I will discuss separately.

2001 is 60 years from the last giant surprise to hit America's shores in Dec. 1941. 60 years is recognized by cyclists - including W.D. Gann - as a crucial 'Grand Cycle'. Could another surprise occur in 2001? Another Gann-related cycle stems from the American declaration of Independence in 1776. 225 years later - 15 x 15 or 5 x 45 geometric years - is 2001. Is a Declaration of Dependence in store?

...As for the stock market, there is a sequence of 19's that is a harbinger of transition. The weeks of January 3rd to March 3rd were exactly 19 weeks from the prior correction and were forecast to usher in a new correction...The first warning shot has been fired across the bow of the US economy and bull market. This does not mean they will immediately go sour. It does, however, reveal a weak point that will be attacked at a more vulnerable and opportune time. **2001 is the year to watch, but 2000 should have some dynamic moves - in both directions - as the first stages of a major transition take place. IT**

5760...The Cycle of Time

The Calm Before The Storm...

6-28-00 - While all looks calm on the Middle Eastern Front, many signs point to a brewing storm that is likely to supersede anything seen in the last decade or two. This might not be apparent to most observers, but from someone that keeps a close eye on Middle Eastern (& Russian) events I can

assure you there is far more posturing going on beneath the surface (or just beyond the horizon if I want to avoid mixing metaphors)... in preparation for something big.

What probably intrigues me most remains the cyclic significance of the period we are about to enter... and the one we are in the process of exiting. Consider the following forecasts (some already fulfilled) and observations made over the last 18-24 months and what they mean for the future.

The first two forecasts (one primarily fulfilled and one in the early stages) and the 4th involve specific markets. As reiterated last month with regard to market moves - these are usually precursors of future fundamental events. If that is the case, these forecasts could have dramatic implications for global events in the coming months/years.

FORECAST #1 - The first involved the crude oil market that was forecast to see a bull market through most of 1999 and throughout the current year of 2000. The following is a 12/99 quote that begins with - and then builds on - early 1999 projections for a Crude rally that would be *'parabolic and extend throughout 1999'*...

2/27/99 - *"On February 24th, for the first time since mid-January, the daily trend reversed to up confirming that a low was taking hold. If April Crude can close above 12.80, it will probably spur acceleration higher."*

3/29/99 - *"This (see above) was the quote from 2/27/99 that preceded the biggest surge in Crude Oil since 1996. Traders entered the month of March long the April contract from 12.48 and were advised to look for a surge to 15.70..."*

...I expect to see a decline into April 16/19th and an intermediate low take hold. If so, the next rally could be parabolic and extend throughout 1999 ..."

The low took hold a few days early (April 8th), a breakout occurred precisely on this key cycle... and the rest is history. Crude did surge higher throughout the remainder of 1999 and is likely to see higher prices in 2000. This analysis fit within the broader outlook for the years of 5759 - 5760 (9/98 - 9/2000) to usher in inflation beginning with Crude.

I would not be surprised to see Middle East developments continue to push oil higher even though a correction could take hold early in 2000. Mid-January is the first coincidence of cycles...If it corrects into January 14/17th, I expect another impressive surge into mid-to-late February, when a more important convergence of cycles aligns." [End 12/99 IT Quote]

CONCLUSION #1 - Crude Oil did rally in a parabolic fashion throughout 1999, did correct in early-January (low was January 10th, instead of the 14-17th), did provide another *'impressive surge into mid-to-late February'* (and even extended 2 weeks beyond this date) and then pulled back.

It has since bottomed and reversed higher as it approaches key cycles that align during the first two weeks of July. I consider this entire move not only a response to near-term fundamentals but also an omen of something bigger on the horizon. Longer-term cycles hint that we could see a retracement from mid-July through mid-October before a surge into April 2001.

This would also fit (conversely) with the likelihood of a stock market low in July and rally into October... before a sharp decline into at least April 2001.

FORECAST #2 - Another important - and potentially related - projection (from 1998) that has seen early fulfillment - but still has the majority of fulfillment ahead - deals with the precious metals market. To repeat from 1998 and from 10/27/99:

"The October PPI report contained a big surprise for non-INSIIDE Track traders and is likely to

be a harbinger of things to come. A dramatic increase in both the reported figure and the core number sparked inflation fears across the nation - a phenomenon contrary to many analysts' & economists' perceptions of the threat of Y2K.

Not surprisingly, this number was presaged by an extraordinary jump in Gold, timed perfectly with the completion of its Cycle of Time decline. I discussed this in the **Cycle of Time III & V** (4/98 & 10/98) and explained why precious metals would complete their cycle in the Jewish year of 5759, the equivalent of our 1998 - 1999. The same time period was cited as a complete Cycle of Time for inflation.

5759 ended on September 10, 1999 & 5760 began... at the EXACT time Gold exited its 19-year (Cycle of Time) bear market!

CONCLUSION #2 - Gold rallied 33% in three weeks' time at the precise transition of this **Cycle of Time** cycle, giving an important omen of things to come. Gold (& Silver) still have a long way to go and are only in the early stages of a new bull market.

As a result, I cannot help but conclude that both political (a future oil shock or other inflationary crisis) and economic (Euro demise or loss of faith in the Dollar after cycles peak in October of this year) surprises are in store.

Since cycles in Gold do not mature (initially) until early-April 2001, and since Gold is one of those markets that typically reinforces the 80/20 rule*, the biggest move in Gold appears most likely to take place after October of this year and possibly not until early-2001. The second set of longer-term cycles matures in mid-February 2002 but will not become important or clear until the April 2001 cycle has past.

[*The 80/20 rule of cycles is discussed in **Eric Hadik's Tech Tip Reference Library** and states that 80% of the move occurs in the final 20% of a given cycle. It is sometimes a 90/10 rule, where 90% of the move occurs in the final 10% of the cycle.]

Silver is similar and the longer-term analysis presented at the same time (10/27/99) remains intact and has been reinforced for 8 months by the action in Silver. To repeat:

"Until Silver can close above 580.0/SIZ on a weekly basis - it remains in a large consolidation from 480 - 580.0. It had a chance to accelerate higher, but never realized this potential and now must contend with intermediate support at 511-515.0/SIZ and longer-term support at 480-484.0/SI."

As already recommended, long-term investors should have begun accumulating positions in late-May and into June. Continue to buy pullbacks with the idea of holding into at least April 2001 and potentially into February 2002.

FORECAST #3 - One of the most important already-fulfilled/non-market forecasts was for the demise of Boris Yeltsin and the ascension of a new Russian leader. As stated in late-November 1999:

*"Boris Yeltsin has been hospitalized for the second time in a week and is reportedly battling pneumonia. This may sound routine - considering all his past illnesses - but cycles are saying different. December 1999 was/is supposed to mark the completion of a Cycle of Time transition period (see the July 1999 **Cycle of Time VII**) in Russia and the ramifications (combined with devastating back-to-back grain harvests) should NOT be underestimated!*

...I would not be surprised to see Boris Yeltsin yield power to Vladimir Putin - either voluntarily,

involuntarily or as a result of incapacitation - in the near future (as early as December or as late as May 2000)." ©11/29/99 INSIIDE Track

CONCLUSION #3 - History also validated this key cycle as Boris Yeltsin stepped down and turned over power to Vladimir Putin on the eve of the new millennium. This event fulfilled numerous cycles of transition in Russia and commenced several new ones. The shortest of these is another 7-year period that will likely see similarities to the old Soviet Union (albeit with a fresh, smiling new face) arise.

In only 2 months since Putin was reelected, he has already exerted his power and influence in many areas, but is meeting some resistance in others. So far, the best example of old Soviet/KGB (of which Putin was head of the successive intelligence agency in the 'New Russia') tactics coming into play has to be Putin's attempt to consolidate the power of 89 provinces under the governing of 7 hand-picked governors.

He has run into some flack, but his resolve is undeterred. At the same time, he is aligning with many of the USSR's old allies with one likely result being another 1973-style conflict in the Middle East. I discussed a unique cycle in Russia in the July 1999 ***Cycle of Time VII*** and demonstrated how **the year 2001 should play an important role in Russian/Israeli relations.**

This could come in the form of direct relations or indirect ones. When Arafat declares statehood (most likely in September), and Syria demands the promised peace agreement be completely fulfilled (also scheduled for September), and **when the most powerful long-term cycle in the Middle East rolls over (from 5760 to 5761 - a new period of 360 years - also in September, 2000), the nations of the world will begin taking sides.** My guess is that Russia will NOT suddenly become an anti-Arab, pro-Israeli nation.

FORECAST #4 - Returning to another market forecast, the stock indices have (or have had) critical cycle peaks aligning in January 2000, March 2000 & October 2000 and an even longer-term cycle (high or low to be determined) appearing in 2001 (19 years from the inception of this bull market).

CONCLUSION #4 - The stock market is likely to play into the overall expectations for troubles to begin accelerating after Middle East cycles reach fruition.

FORECAST #5 - In my view, the most important forecast and cycle involves the nation of Israel. For such a tiny country to ultimately have such a big impact seems illogical. But, then again, so has their entire history. Investors do not have to look far to see the consequences of recent events involving Israel. In 1990/1991, Saddam Hussein attempted to drag Israel into his Kuwaiti debacle but the timing was not right.

However, in 1973 it was another story as a Russian/Arab coalition wreaked havoc on the economy & equity markets of a US/Israel coalition. The big difference now is that the US has isolated herself in many ways while Israel is in a similar predicament. Is it just coincidence that the culmination of a 7-year peace process (ushered in with the Oslo Accord) is in precise alignment with the culmination of a 360-year cycle of war/trials/exclusion/torture/judgment for Israel... that dates back to the time of Daniel & the Babylonian Kingdom?

A recent AP quote gives a quick synopsis of where the alleged 'peace process' stands and also reflects the clever posturing that has been going on (in order to isolate Israel in the world's eyes) for months...

Arafat has already won the backing of many European nations and of the Vatican (which sees Israel as a threat to Christian holy sites) in addition to the entire Arab community. The only thing left is for him to declare statehood and a jihad (holy war) to 'free' Jerusalem from the Jews. **Storm**

clouds are brewing and the period of Sept/Oct 2000 should see the first drops of rain begin to fall. All of this reinforces the same conclusion I made throughout 1999, particularly related to Y2K. As reiterated on 10/27/99:

"All my long-term cycles still point to the year 2001 as being more significant than 2000."

5760...The Cycle of Time

Jerusalem: Defying All Logic...

7-28-00 - While recent events do not conjure up images like those proclaimed by the Jewish prophet Zechariah, they do validate the potential for an ultimate war focused on Jerusalem that could involve much of the world. Though this defies common logic - why such a small town as Jerusalem would one day incite a world war - so does every other event surrounding the nation of Israel.

100 years ago, no one (except a few Zionists) believed that Israel would again become a nation, despite specific Biblical prophecies concerning this event. Defying all logic, Israel became a nation on May 14, 1948. (This event also defied logic as it resulted from the murdering of 6,000,000+ Jews - an undertaking that was perpetrated to destroy the Jewish identity and instead strengthened it.)

Immediately after its declaration of statehood, no one thought it could survive the immediate attack by its Arab neighbors and their attempts to push Israel into the Sea. Israel defied all logic and did survive. When the Arabs plotted again and again on ways to annihilate Israel, the opposite came true: Israel's boundaries expanded, defying logic.

In 1967, it defied all logic that a group of Arab countries - again bent on 'pushing Israel into the Sea' would be defeated by Israel in 6 days. They were.

During the recent Gulf War, it defied logic that 39 Scud missiles launched into Israel would result in the direct killing of only 1 Israeli while a single Scud launched into Saudi Arabia would kill many US servicemen.

Now, in a 'process' to reverse past successful defenses, it defies logic that the entire world would rally around an attempt to force Israel to grant relatively small parcels of land to the Palestinians for a homeland - when other Arab countries (i.e. Jordan, etc.) have blatantly denied the Palestinians the same privilege in a country that had room to spare (and in which the Palestinians had resided).

From a religious standpoint, it defies logic that a major church would be ignoring dozens of Biblical promises and prophecies, instead corroborating to deny Israel the right to remain in control of Jerusalem and its holy sights and would be fighting for these landmarks to come under either Muslim (PLO) or secular (UN - 'church & state') control. However, recent proclamations and agreements between the Palestinians and the Vatican attempt to do just that.

Even during the recent Camp David meetings, the pope made sure his voice was heard by declaring:

"The Holy See continues to maintain that only a special statute internationally guaranteed can effectively preserve the most sacred areas of the Holy City." This followed the February 2000 accord with the Palestinians in which the Vatican stated that an "equitable solution" for Jerusalem, based on international resolutions, was "fundamental for a true and lasting peace."

(7/23/00 AP article by Ellen Knickmeyer)

It is interesting - in light of prophecies cited in Revelation 11:1&2 - that not only Jerusalem but even the temple (likely to be rebuilt soon, perhaps as a concession to Israel for allowing part of Jerusalem to come under UN or PLO control) will one day be under diverse or international control:

*"I was given a reed like a measuring rod and was told, "Go and measure the temple of God and the altar, and count the worshipers there. **But exclude the outer court: do not measure it, because it has been given to the Gentiles.**"*

Again, this defies logic. So, if verses from Zechariah appear to defy logic, they are simply maintaining the consistent pattern that has surrounded Israel since its birth.

It is intriguing that the recent Camp David failure occurred during one of the most ominous periods in Israeli/Jewish history. This time frame is best known as 'Between the Troubles' and is a 21-day period commemorating the Fast of Tammuz to the Fast of Av (7/19-20/00 - 8/10/00).

This period is the same time that the walls of Jerusalem were breached by Nebuchadnezzar to the time that the city of Jerusalem fell and the temple was destroyed.

Tishah b'Av - the 9th of Av - is the date on which BOTH Jewish temples were destroyed (586 BC & 70 AD) and equates to August 10, 2000. It also incorporates the time (8/02/90) in which a modern-day Nebuchadnezzar (Saddam Hussein) began a Middle East war and attempted to turn it against Israel.

Once again, the fate of Jerusalem is threatened during this historical period. Jerusalem is becoming the focal point of world attention at the EXACT time when major cycles roll over. Since publishing the ***Cycle of Time V*** (10/98...see www.insidettrack.com for pertinent excerpts), I have repeated many times the significance of the Jewish Year 5760 - a number exactly divisible by 360.

This year - lasting from September 1999 - September 2000 represents the completion of a 360-year period (and a 'week' of 7 - 360-year periods since Daniel's revelation regarding 'the desolation of Jerusalem' and his dream regarding the time 'decreed for your people and your holy city to finish transgressions...'). Other revolutions were equally notable...

During the final 7 years of the first period of 360 years after Daniel's dream, the temple was being defiled but then recaptured and re-dedicated by Judas Macabee (Hanukkah).

Exactly 4 1/2 periods of 360 years after Daniel's dream (and a Biblical 3 1/2 periods of 360 years after the temple was revived), the siege of Jerusalem culminated in the beginning of the Crusades in **July** 1099. (This was the early stages of a 360-year campaign against Muslims and Jews that began with the primary goal being to retake Jerusalem.)

Now, 7 periods of 360 years from Daniel's revelation and dream, 6 periods of 360 yrs. since the temple was defiled, recaptured & re-dedicated, 2 1/2 periods of 360 yrs. since Jerusalem was again the focus of world attention and almost 2 periods of 360 years since King Edward expelled all English Jews (another example of the Roman/Western European attacks against Jews), the world's attention is again focused on Jerusalem and the well being of the nation of Israel.

The more things change, the more they stay the same. Or, as Solomon put it, "What has been will be again, what has been done will be done again; there is nothing new under the sun. Is there anything of which one can say, 'Look! This is something new'? It was here already, long ago; it was here before our time." (Ecclesiastes 1:9-11 NIV)

Copyright 7/28/00 (August 2000) INSIIDE Track Newsletter

September 2000 (into Sept. 2001 & into Sept. 2007) ushers in the beginning of a new, MAJOR ***Cycle of Time*** as well as a convergence of War Cycles & Earth Disturbance/Climate Change cycles.

INSIIDE Track Terminology

Daily/Weekly 'Trend' – A LAGGING indicator – based on a proprietary indicator – & used in three primary roles. The first is to confirm an evolving trade. The second is to identify the most likely time (within 1-3 periods) for the end of the first wave of a new move. The third is to alert a trader when to prepare for an upcoming 3rd wave move – usually the most dynamic and extensive.

2 Close ReversalTM – A market sets a new high above the previous day's/week's high and subsequently closes below both of the 2 previous closes... or vice-versa (new low and close above both of the 2 previous closes).

Extended 2 Close ReversalTM – A market sets a new high above the previous day's/week's high and closes below the previous day's close (key reversal) but waits an additional 1-3 periods to close below the original 2nd Close... or vice-versa.

2nd Close Resistance/SupportTM – The closing price of two days/weeks prior to the current period and/or the confirmation level of a key reversal that has not yet closed beyond the 2nd Close (in an Extended 2 Close ReversalⓄ).

2 Step ReversalTM – A pattern encompassing at least 3 trading days/weeks but no more than 7 days/weeks in which two corresponding 2 Close Reversals occur in the same direction with consolidation in between (but NO conflicting 2CRs in the interim). www.insiidetrack.com

Double-Key ReversalTM – A key reversal (new low and higher close or new high and lower close) followed by a second key reversal in the SAME direction. In other words, back to back days/weeks of new highs & lower closes or new lows & higher closes.

Turn-Key ReversalTM – A key reversal (new low and higher close or new high and lower close) followed by a second key reversal in the OPPOSITE direction. In other words, back to back days/weeks where the market makes a new low and closes higher, only to make a subsequent new high and lower close... or vice-versa.

Intra-month VTM – A month in which a market trades lower into mid-month, then reverses higher (ideally between the 13th & 18th), then rallies and sets new (intra-month) highs before the end of the month. www.insiidetrack.com

Intra-month Inverted VTM – A month in which a market trades higher into mid-month, then reverses lower (ideally between the 13th & 18th), then declines and sets new (intra-month) lows before the end of the month.

Intra-month X-X (Extreme-Extreme)TM – A month in which a market begins at one extreme (high/low) and trades in the opposite direction the remainder of the month – setting the opposite extreme (high/low) in the final days of the month.

MAC, AMAC & MARCTM – Moving Average Channel calculations based on highs or lows of a specified time period.

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS & THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY A PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK & NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. THE ABILITY TO WITHSTAND LOSSES OR ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE MANY OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF A SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS – ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
