Market Analysis.....7

Terminology.....12

“When you hear of wars and revolutions, do not be frightened. These things must happen first...Nation will rise against nation, and kingdom against kingdom. There will be great earthquakes, famines and pestilences in various places, and fearful events and

great signs from heaven...

There will be signs in the sun, moon and stars. On the earth, nations will be in anguish and perplexity at the roaring and tossing of the sea. Men will faint from terror, apprehensive of what is coming...”

Luke 21:9-11, 25-26 (NIV Translation)

February 2010 - *The following is an excerpt from the February 2010 INSIIDE Track AND the March 2009 INSIIDE Track that discuss the convergence of South American Earth Disturbance Cycles that occur in the months of **February, May, August & November...** and which are expected to grow in intensity and devastation during the same months in 2010 & 2011 (when longer-term earthquake cycles hit a crescendo).*

This is also linked to the Sun’s 11-Year Sunspot Cycle which just bottomed in 2009 and is turning up now. More comprehensive analysis, context and expectations for the coming years can be found in related publications like [The 17-Year Cycle Reports](#).

As is often emphasized - [which is critical to keep in mind when reading this information](#) - these cycles are analyzed and discussed as an-

other example of the application of cycle analysis. They are not addressed to sensationalize possible events or to minimize the often-tragic impact of those events... but rather in an attempt to encourage readers to recognize and learn from the repetition of these events...

Outlook 2010 - 2011...

The Geometry of Time

01-29-10 - “...One of the first things that can be learned from this is the geometric nature of time. This principle was at the core of W.D. Gann’s approach to the markets, is alluded to throughout the Bible and is ubiquitous in nature and in our lives... even though we rarely recognize it.

Simply put, time is measured by the elliptical rotations of the planets. Every circuit (‘circle’, although not exactly) represents a full measure of time... in a 360-degree movement of the related planet. As a result, the key divisions of that ‘circuit’ - or ‘cycle’ - also time important events.

The most important of these arrive at 90-degree intervals. Just as the seasons time important transitions and events in the natural year - at 90-degree intervals on the calendar and at 90-degree

(Continued on page 2)

intervals of the earth's rotation around the Sun - so, too, do 90-degree movements in time - within various cycles. These can be measured on many intervals, but I have seen the most consistency in days & years...

The Other 90-Degree Sequence

Since we are approaching the month of February, I should also reiterate the other 90-degree sequence that has governed so many earth disturbances - both earthquakes and volcanic eruptions - in South America.

It involves the months of February, May, August & November.

Similar to the aforementioned Sequence, the 180-degree couplings - like the January/July & April/October pairings - seem to have their own unique relationship.

The May/November coupling has seen many of the major volcanic eruptions and the largest magnitude earthquakes.

In contrast, the February/August pairing has not been as significant but has still supplied many 'events'. February 2009 saw 6 sizeable earthquakes (ranging from mg. 5.5 - 6.2) in Chile, Peru, Argentina & Brazil.

February 2010 could see some corresponding quakes in S. America.

...These increasingly frequent swarms - of major earth disturbances (like birth pains that increase in frequency and intensity) - warrant some further discussion on the Cycle that was expected to trigger these swarms during this specific time frame...

'Signs in the Sun'

The (approximate) 11-Year Sunspot Cycle identifies the ebb and flow of solar activity. This is important since this activity - massive explosions on the surface of the Sun - generate electro-magnetic storms that sometimes bom-

Chile... & the 17-Year Swarm Cycle **Major EQs/Volcanoes at 17-Year Intervals**

- 1837-1840 - Chile EQ (tsunami hits Hawaii)
- 1854-1857 - [Honduras EQ]
- 1871-1874 - [El Salvador EQ]
- 1905-1908 - Chile EQ (8.6; 20k dead)
[Ecuador - 8.8; 5th Largest in 150 yrs]
[Colombia - 8.6; all three in 1906]
- 1922-1925 - Chile/Argentina (8.5; 12th Lgst]
- 1939-1942 - Chile (7.8; 30-40k dead)
- 1956-1959 - [Colombia EQ]
- [1960 - Chile (9.5; Largest in recent history)
- 1973-1976 - [Guatemala EQ; 7.5]
- 1990-1993 - Chile: Mt. Hudson Eruption (one of largest in 20th Century; Aug. - Oct. 1991)
[Peru, Costa Rica]
- 2007-2010 - Chile: Chaiten Volcano Eruption(s)

bard earth.

Being a magnetic planet, and electro-magnetic creatures (why else would EKGs & EEGs be so effective), these storms - or lack thereof - have a profound influence on Earth, Earth's climate (despite what a modern agenda says)... and Earth's inhabitants.

As the data on page 5 demonstrates, this Sunspot Cycle is just *beginning* to turn back up. If it follows expectations (which it has NOT done up to this point), the coming years could see a significant increase in major solar storms and 'events', exacerbating and/or magnifying all of the other cycles that are culminating at the same time.

I have repeatedly demonstrated how this Cycle impacts wars - particularly in the Middle East - and, when coinciding with the geomagnetic, 17-Year Cycle (every 3 phases of the 11-Year Sunspot Cycle closely correlate to every 2 phases of the 17-Year Cycle) also time

economic depressions, stock market collapses, banking failures, currency destabilization, earth disturbances, etc. [This was all described in or before 2007.]

On a larger-degree basis, there are other things that this has timed - like Disease/Plague Outbreaks - and which could become an increased possibility in the coming years.

However, it has also timed the obvious - solar storms and weather extremes.

The reason this is intriguing is because the coming years represent a convergence of cycles - including a *40-Year Period of Testing* - originating from previous events (i.e. massive solar explosion in 1972) and portending some extreme events in the next 2-3 years.

These events include some of the greatest solar explosions on record, some of the greatest floods of the last two centuries, one of the coldest periods of the past 500 years (when there was virtually no solar activity for 7 decades)... and even an intriguing man-made weather 'influence'.

All of these point to the coming years as a time when solar & weather disturbances are likely to occur, just as the current *Sunspot Cycle* is likely to be accelerating higher. This is when most of the extreme solar storms have occurred.

This might seem like a manageable (potential) event, but our escalating dependency

on electronics and satellite technology remain the *Achille's Heel* for Western Society (and, increasingly, for the entire civilized world).

One only has to look back to 1997 & 1998 and to 1989 to see what an impact solar storms had on satellites... and that was back when there were not near as many satellites and not near the dependency on them.

It may not, however, be just solar magnetic storms bombarding the earth. In case you were not listening, two surprise meteor/asteroid strikes hit earth's atmosphere during a 3-week period in late-2009. One exploded over Indonesia (late-October) and the other over the Western United States (mid-November).

With all the technology & know-how we think we possess, both of these events were described as 'unexpected', 'without warning', 'a surprise'.

Similar descriptions were used in 2008/2009 even though a VERY consistent cycle projected a 2-3 year, 35-50% drop in the Stock Market. After the drop took place, there was *'no way anyone could have ever anticipated that'*. Wrong. *What will they say when a major solar storm disables satellites, electrical grids, etc.?* "OOPS." ??? IT [End of excerpt from 1/29/10; February 2010 issue of INSIIDE Track.]

The following is an excerpt from the March 2009 INSIIDE Track - published on 2/26/09 - that provides additional context and details regarding the South American Earth Disturbance Cycle that is nearing a crescendo. The tables on page 2 & 3 are also from that March 2009 INSIIDE Track and demonstrate the cycles that are peaking in 2010 and that converge during the month of February...

17-Year Earth Disturbance Cycle...

2-26-09 - Similar to the 90-degree cycle that influences Mr. Ahmadinejad's actions, S. American earth disturbances have been on the same cycle (don't ask me why earth instability in the Southern & Western Hemisphere coincides with mental & emotional instability in the Northern &

Eastern Hemispheres).

This was demonstrated throughout 2008 but I have brought together - and updated where necessary - all the cycles followed and discussed last year. These cycles begin with the **17-Year Swarm Cycle** that has impacted global earthquakes and volcanoes (see January 2009 INSIIDE Track II), but also earthquakes and volcanoes in Central & South America... with a particular emphasis on Chile.

Leading into the latest 'swarm' - in 2007 - 2010 - Central & South America were displaying an uncanny precision on a 360-degree basis, experiencing major earthquakes and/or volca-

noes in mid-November during 2004, 2005, 2006, 2007 & 2008!

And, as the 2007 - 2010 'Swarm Cycle' was beginning, this 360-degree cycle broke down into a very consistent 90-degree cycle. Could this be leading into a crescendo - a major earth event - just as accelerating and intensifying birth pains herald the imminent arrival of a new creation?" IT

END of excerpt from March 2009 INSIIDE Track publication (and February 2010 INSIIDE Track). Much more information and analysis can be found in the full, 12-page February 2010 INSIIDE Track.

INSIIDE Track Terminology

Weekly/Monthly 'Trend' – Lagging indicator (proprietary calculation) used to: 1 - *Confirm* an evolving trade. 2 - *Identify* likely time (w/in 1-3 periods) for the end of the first wave of a new move. 3 - *Alert* a trader to prepare for an upcoming 3rd wave (often most dynamic).

2 Close Reversal™ – A new high above the previous day's/week's high & subsequent close below both of the 2 previous closes... or vice-versa (new low & close above both of the 2 previous closes).

MAC, AMAC & MARC™ – *Moving Average Channel* calculations based on highs or lows of specified time period.

Please refer to **Eric Hadik's Tech Tip™ Reference Library**.

ADMINISTRATIVE NOTES

INSIIDE Track intra-month updates will be e-mailed on **Feb. 4th, 11th & 22nd** and any day the DJIA closes 200+ pts. in either direction. INSIIDE Track Update trades are distinct from INSIIDE Track newsletter trades and should be maintained separately.

www.insiidetrack.com

All trades should be exited or rolled into lead contract before first notice day. Until updated stops given, use equivalent stop calculated from close on day of rollover. Trading strategies apply to **24-hour trading session**.

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY A PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. THE ABILITY TO WITHSTAND LOSSES OR ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE MANY OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF A SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS -- ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
