Outlook 2011.....1  
 Earth Disturbance.....1  
 Japan EQ Cycles....2-3

“Does not wisdom call out? Does not understanding raise her voice? ...Choose my instruction instead of silver, knowledge rather than choice gold, for wisdom is more precious than rubies, and nothing you de-

sire can compare with her...

Counsel and sound judgment are mine; I have insight, I have power. By me kings reign and rulers issue decrees that are just; by me princes govern, and nobles—all who rule on earth. I love those who love me, and those who seek me find me.

With me are riches and honor, enduring wealth and prosperity. My fruit is better than fine gold; what I yield surpasses choice silver. I walk in the way of righteousness, along the paths of justice, bestowing a rich inheritance on those who love me and making their treasuries full.”

Proverbs 8: 1, 10-11, 14-21 (NIV Translation)

**February 2011** - In January 2010, I explained why **late-2010 into early-2012** is a geophysically-vulnerable time for Japan - when the 17-Year Cycle of multiple, MAJOR earthquakes & volcanoes reaches fruition. Pertinent analysis - from the January 2010 INSIIDE Track - is repeated in this Report, in an attempt to bring newer readers up to speed on **Earth Disturbance Cycles**.

First, however, is a reprint of some intriguing patterns that have just developed and appear to be ushering in this unstable time frame. As just published in the February 2011 INSIIDE Track, Japan has begun to see an increase in frequency and intensity of earthquakes and - most recently - a volcanic eruption.

The months of **February & March 2011** are the anniversaries of major global earthquakes in 2009 & 2010 and should be monitored, particularly when combined with these multi-year cycles in Japanese earthquakes.

**It is critical to keep in mind when reading this information** - these cycles are analyzed and discussed as another example of the application of cycle analysis. They are NOT addressed to sensationalize possible events or to minimize the impact of those events... but rather in an attempt to encourage readers to recognize and learn from the repetition of these events...

## Outlook 2011...

### **Date With Destiny II**

**01-31-11** - Sometimes it takes a while for validation to occur. Other times, it comes right away. With respect to projections for **2011** being a *Date with Destiny* - a watershed year with surprising changes expected throughout the Middle East and around the globe - initial corroboration appeared quickly...

### Earth Disturbance Update

**1-29-11** - January saw new earth disturbances, with a couple interesting patterns emerging. The most notable is one that has been discussed previously and it has to do with activity around Iran. In recent days, a 6.1 quake struck Tajikistan and was followed by a 5.8 in Iran. The strongest in that region, however, was a 7.4 that struck Pakistan on Jan. 18th.

Another pattern has been developing in Japan. In the last two months, the Bonin Islands area has experienced 6.6, 7.4, 6.3 & 6.5 quakes with the last occurring right at the **mid-January** time frame. More activity is likely and has been joined by recent volcanic activity on **Jan. 28th**.

...The current time frame stretching into March) is the 1-year and 2-year anniversary of major quakes and volcanic eruptions in 2010 & 2009...With major volcanoes projected for **2012--2014**, **2011** is bound to see some substantial 'precursor activity'. *IT*

...End of excerpt from February 2011 INSIIDE Track

[Beginning of excerpt from January 2010 INSIIDE Track...]

1-05-10 - In some ways, expectations for 2010 - 2011 are similar to those for 2000 - 2001.

10 years ago, a great deal of anxiety greeted the onset of 2000 (Y2K). Stock market cycles - discussed in late-1999 - were projecting an early-2000 peak (see *Bubble of the Decade* discussions from 1999) and the onset of a major bear market.

However, *War Cycles* - and other geopolitical cycles - were pointing to 2001 as the most dangerous. As emphasized many times and in many ways:

*"All my long-term cycles still point to the year 2001 as being more significant than 2000...events in 2000 could pale by comparison to what will occur in 2001."*

[Nov. 1999 INSIIDE Track]

The same could be said about 2011 as compared to 2010...the coming years could also see some undermining of *geophysical stability*...

## 14/28 Year\*\* Major/Deadly Earthquake Cycle

<u>Year</u>	<u>Magnitude/Location</u>	<u>Deaths</u>
1906 -	8.2 quake in San Francisco	3,000
	8.8 quake near Ecuador	1,000
	7.1 quake - Taiwan	1,300
	8.2 quake - Chile	20,000
1920 -	8.6 quake - Kansu, China	200,000+ <sup>1</sup>
1934 -	8.1 quake - India	10,700
1935 -	7.5 quake - Pakistan	40,000
	7.1/6.5 quakes - Taiwan	6,000
1948 -	7.3 quake - Turkmenistan	12,000
	7.3 quake - Japan	5,400
1962 -	7.3 quake - Iran	12,200
1976 -	7.5 quake - Guatemala	22,000
-	7.6 quake - China	255,000+
-	7.3 quake - Turkey	4,000
-	7.9 quake - Philippines	8,000
-	7.1 quake - New Guinea	5,000+ <sup>2</sup>
-	6.5 quake - Italy	1,000
1990 -	7.7 quake - Iran	50,000
-	7.8 quake - Philippines	1,600
2004 -	9.0 quake - Indonesia	110,000+

<sup>1</sup> - Estimates run as high as 655,000 dead

<sup>2</sup> - 5,000 - 9,000 missing; presumed dead

\*\*This cycle has often broken down into its 7-Year division, as well... producing major earthquakes in 1997 (see accompanying table) & 1983 (Colombia w/5,000 deaths & Coalinga, CA). **2011 is the next in that phase.**

## Earth Disturbance Cycles

Nov. '09 fulfilled South/Central American earthquake and volcano cycles (5.6 in Argentina, 6.5 in Chile, 5.8 in Bolivia, 6.1 in Argentina - 3 of which struck in a 24-hour period - a 5.7 in Argentina, 5.9 in El Salvador and a 5.5 in Venezuela, all while the Galeros Volcano in Columbia began erupting) and looked ahead to **May 2010 & November 2010**, when these geometric cycles again converge.

In the interim, we are approaching the **mid-January** period in which - along with its 180-degree partner in **mid-July** - dozens of earthquakes have struck Japan and the U.S. (West Coast).

***"This cycle has often broken down into its 7 -Year division, as well... producing major earthquakes in 1997 (see accompanying table) & 1983 (Colombia w/5,000 deaths & Coalinga, CA). 2011 is the next in that phase."***

...major earthquakes in 1993 (CA & Japan), 1994 (powerful & costly Northridge, CA quake), 1995 (devastating Kobe, Japan quake), 1997 (Japan, Indonesia quakes & Indonesia volcano eruption) and 2001 (Indonesian quakes).

...Here again, **2010** could/should see some major activity but **2011** is expected to overshadow whatever occurs in 2010. Even these mid-January quakes seem to occur on more of a 2-year interval (1993, 1995, 1997, 2001, 2005, 2007 & 2009)... reinforcing the focus on **January 2011**.

The period from **very-late-2010 into very-early 2012 (Dec. 28th 2010 - Jan. 17, 2012)** represents a 7-year cycle from the massive earthquake and tsunami of Dec. 2004 and a **17-Year Cycle** from the destructive California &

Japan earthquakes of Jan. 1994 - Jan. 1995 (in addition to all the other *Earth Disturbance Cycles* that have been enumerated in the past).

**Mid-2011** is also the next in a 10-Year series of major volcanic eruptions that includes the mid-1991 eruptions of Pinatubo, Unzen & Hudson as well as the mid-2001 eruptions of Etna & Mayon.

As I explained in 2007 - when describing the *17-Year Cycle* that was projecting a stock market crash - this *Cycle* is closely linked to the magnetic swings in the core of the earth and has pinpointed a recurring series of earthquake swarms over the past 200 years. *IT*

**END of excerpt from February 2011 & January 2010 INSIIDE Track publications, highlighting the cyclically-precarious & unstable time that Japan has entered... and that stretches into early-2012. The Western U.S. has related cycles that are discussed separately.**
