“Seismic Swarm Cycles II - 2019/2020 Crescendo”

Outlook 2019

The ~11-Year Cycle

02-27-19 - The Sun has at least three intriguing cycles that repeatedly emerge in the markets, in geopolitics, in military conflict, and in most aspects of life. The biggest (of these three, although there are also longer-term cycles as well) is the ~40-Year Cycle of the Great Conveyor Belt of the Sun.

To summarize it, this is the plasma flow that circumvents the Sun, moving from its equator out toward one of the poles and then - after sinking lower - back toward its equator. It takes approximately 40 years for that to transpire... and then it occurs toward the opposite pole and back.

So, a total circuit would take roughly 80 years (perfectly coinciding with the 80-Year Cycle of War that comes back into play in **2021**, linked to the US entry into WWII in 1941, into the Civil War in 1861 and out of the Revolutionary War in 1781. In the colonies, England and Europe, that has been documented for a few hundred years before 1781.).

If I understand the process correctly, the initial phase - flowing from equator to pole - goes along the surface of the Sun and ‘sweeps’ up decaying sunspots and their related magnetivity and then drops them off at the poles.

As a result, it greatly impacts the magnetic force of the Sun... which impacts subsequent sunspots and the magnetic barrages periodically flung at Earth (CMEs)... which could have an exponentially greater impact as Earth converts to a digital world.

As a result, it would stand to reason that the fluctuations of the *Great Conveyor Belt of the Sun* dramatically influence the other two primary cycles in this discussion.

To and Away

The second solar-related cycle is the 17-Year Cycle that impacts some form of magnetic interplay be-

tween the Sun and Earth (the ‘to and away’ interaction as described by David Junkett at <https://link.springer.com/article/10.1023/A:1005075703810>).

This has also been repeatedly discussed over the past two decades. It has its strongest impact at the 34-year point (two full cycles), when it coincides with three of the following solar-related cycles...

Cause and Effect

Perhaps the best-known solar cycle is the one that governs the ebb and flow of sunspots or solar storms. It is an ~11-Year Cycle (averages out to 11.2 years) that has an uncanny knack for also linking monetary and military events of *cause and effect*. Perhaps a better way of describing that would be the *Cycle of Unintended Consequence*.

Events during one phase of this cycle often have a distinct and irrefutable link to events during the next phase. In many cases, those phases also link similar players or similar events. (I have often documented an overlapping 11-Year Cycle that impacts Middle East conflict and recurs in **2021/2022**.)

180 Degrees: The January/July Cycle

The preceding are the opening comments from the recently-published March 2019 *INSIIDE Track*. This analysis corroborates the outlook (discussed in the June ‘18 *Seismic Swarm Cycles* and related articles before and after that) for **2019/2020** to see a sharp spike in geophysical activity - with focus on a few specific time frames.

The *initial* focus falls on the periods from **late-Dec. ‘18 into late-Jan. ‘19** and on **late-June - late-July ‘19**. Those two periods have been detailed and discussed for over a decade. They have repeatedly timed many of the most significant earthquakes surrounding the Western US and Japan... but also incorporating both adjacent sections of the *Ring of Fire* (Alaska down to Mexico and Japan down to Philippines, including China and Taiwan).

[See *January/July ‘Ring of Fire’ Earth Cycle* table on

INSIIDE Track

“Seismic Swarm Cycles II - 2019/2020 Crescendo”

page 3, reprinted from the Feb. 2010 *Earth in Transition 3 + 3 III Report*.]

The purpose of this publication is to compile and reiterate some of that related analysis that projects the next 2 - 3 years to be an unsettling time - in and out of the markets. It is also to reiterate the uncanny connection between times of *geopolitical* instability and *geophysical* instability.

2019/2020 is expected to be that type of period.

The table on page 4 is also reprinted from the March 2019 *INSIIDE Track* and illustrates many of the global shaping events that have occurred on this uncanny ~11-Year Cycle rhythm. **2019** is also likely to be the start of a new *Solar Cycle* (#25) - the perfect validation to this Sunspot-related cycle.

The January/July Cycle Perpetuated

Already, **January 2019** has (again) powerfully validated that 180-degree *Jan./July Earth Disturbance Cycle*, producing a 6.0 earthquake in Alaska (1/05/19), a 6.3 in Japan (1/08/19), a series of three major quakes in Indonesia (6.6, 6.0 & 6.3 on 1/06 - 1/22/19) and a 6.7 quake in Mexico (1/20/19)... not to mention a 6.8 in Brazil on Jan. 5.

The Jan. 8 quake in Japan came almost exactly 180 degrees (6 months) from a previous 6.0 that struck on July 7, 2018. Prior to that, Jan. '18 felt a 6.3 in Mexico and a monster 7.9 quake in Alaska. 180 degrees earlier, a 6.5 struck the Philippines on July 6, 2017. Before that, Jan. 2016 witnessed a 6.7 in Japan and a 7.1 in Alaska.

The *January/July Ring of Fire Earthquake Cycle* continues to be just as pertinent and prescient today as it was in 1992 - 2009. That 180-degree cycle continues back for decades, including July 7 & 11, 2014 (6.9 in Mexico & 6.5 in Japan). July 3, 2015 felt similar quakes in Philippines (6.1) and China (6.4). **And July 2019 is slated for more.**

In order to address the obvious skepticism that arises

each time this type of topic is addressed, it is a good time to review a few key explanatory excerpts from the June 2018 *Seismic Swarm Cycles Report*...

Geophysical Cycles & Swarms

06-05-18 - “There is strong evidence, in my opinion, that earth disturbances ebb and flow on a cyclic basis. Yes, there are earthquakes rocking diverse regions throughout the world almost every day.

And yes, there are always a couple dozen resurgent volcanoes around the globe... exhibiting some form of eruptive activity throughout each year. That does not change or diminish the fact that these earth disturbances tend to group into swarms of increased tectonic activity on a consistent basis.

It is my contention that newly-discovered cycles - one that governs geomagnetic swings within the earth's core and also impacts the interaction between the earth and sun's magnetivity - are key components in this recurring oscillation of seismic activity.

The intervening periods of relative dormancy (a significant decrease in global activity) are also cyclic. 2008 - 2011 was a recent period of intensifying activity - with 2010 - 2011 representing the culmination of that phase.

2017 - 2020 is expected to be another with **2019 - 2020** expected to be a type of crescendo. There are some very unique aspects to this phase, however, that warrant closer scrutiny.”

06-05-18 - “The 7-Year Cycle timed a recurring sequence of spikes... every 7 years there had been a spike in the concentration and intensity of earthquake activity. However, it was the overriding 14-year and 28-year cycles that were more accurate and timed many of the most dramatic events...

That earthquake/volcano sequence was expected to recur in **2018/2019** - an overarching 28-Year Cycle (detailed separately), 40-Year Cycle, ~100-Year Cycle & ~200-Year Cycle.”

(Continued on page 5)

INSIIDE Track

“Seismic Swarm Cycles II - 2019/2020 Crescendo”

January/July ‘Ring of Fire’ Earth Cycle

July 12, 1992...3rd in series of 7.0+ quakes in Yucca Valley, CA.

July 15-16, 1992...Second eruption of Mt. Pinatubo

January 15, 1993...5.7 magnitude quake in Gilroy, CA

January 16, 1993...7.5 magnitude quake in N. Japan

July 12, 1993...7.8 magnitude quake in N. Japan.

January 17, 1994...6.6 mag. quake in Northridge, CA

July 31, 1994...6.4 magnitude quake in N. Japan

January 17, 1995...6.8 earthquake in Kobe, Japan

July 3, 1995...5.6 magnitude quake struck Tokyo

January 7, 1997...7.3 magnitude quake struck Mexico

January 17, 1997...Mt. Merapi (Indonesia) erupts

January 17, 1997...6.1 quake in Indonesia

January 17, 1997...6.3 quake in S. Japan, near Kobe

January 21, 1997...6.3 AND 6.4 quakes in W. China

July 11, 1999...6.6 magnitude quake in Honduras

January 14, 2000...5.6 AND 5.2 quakes in China

July 1 - 30, 2000... 9 quakes (5.4-6.4) in Honshu, Japan

July 5 - 24, 2000... 6 quakes (5.4-5.9) in Indonesia

January 13, 2001... 7.7 quake El Salvador

January 16-18, 2001... 6 quakes (5.5-6.7) in Indonesia

January 26, 2001... 7.7 quake in India

July 13, 2001... Mt. Mayon (Philippines) & Mt. Etna erupt

July 3 - 24, 2001... 6 quakes (5.5-7.2) in S. America

January 22, 2003... 7.6 quake in Colima, Mexico

July 21, 2003... 6.0 quake in Yunnan, China

January 16, 2005... 6.6 quake in Micronesia

July 17, 2006... 7.7 quake in Java, Indonesia

January 13, 2007... 8.3 quake in Kuril Islands, Russia

July 16, 2007... 6.6 & 6.8 quakes in Japan

July 19 & 23, 2008... 7.0 & 6.8 quakes in Honshu, Japan

January 3, 2009... 7.4 & 7.6 quake in Indonesia

January 8, 2009... 6.1 quake in Costa Rica

January 15, 2009... 7.4 quake in Kuril Islands, Russia

January 15-19, 2009... 6.7, 6.5 & 6.4 quakes near New Zealand

July 9, 2009... 5.7 quake in Yunnan, China

July 15, 2009... 7.8 quake off coast of New Zealand

“Seismic Swarm Cycles II - 2019/2020 Crescendo”

~11-Year Cycle of Global-Shaping Events

Reaction begets action begets reaction...

2019 - 2020 ????? China economy decline lead to conflict? S China Sea. Russia/China alliance.

2008 - 2009 - Financial and real estate meltdown (triggers shift in global faith in US and West; China and Russia initiate multiple financial, economic and military alliances to compete with the West); Formalization of *BRIC* (later BRICS) exemplifies these alliances.

1997 - 1998 - Asian and then Ruble Crisis; final parabolic rise in stocks and then crash leads to unending interest rate declines... leads to real estate bubble.

1986 - 1987 - 18 month interest rate rise... leads to stock market crash

1974 - 1975 - Watergate, Nixon, stock crash, end of Viet Nam war (1976 = death of Mao, ushers in economic reforms in China - triggering a *40-Year Cycle* that is now reaching fruition.)

1963 - 1964 - Aftermath of *Cuban Missile Crisis*, Khrushchev's demise; assassination of JFK; *Gulf of Tonkin* incident, and resulting *Resolution*, leading to massive buildup of US troops in Viet Nam by LBJ (...and that led to China & Russia re-establishing relations after a decade-long split - a recurring pattern in this cycle).

1952 - 1953 - Culmination of Korean War; Soviet assistance to Chinese on side of N. Korea.

1941 - 1942 - Entry into WWII; Culmination of *Great Depression*; End of second multi-year stock decline (1942).

1929 - 1930 - Stock Crash and *Great Depression*.

1917 - 1918 - WWI, Bolshevik Revolution

1906 - 1907 - *Panic of 1907* - also rescued by J.P. Morgan (see below); led to forming of Federal Reserve;

1895 - 1896 - Gold reserve of US Treasury saved with 65 million loan from JP Morgan and Rothschilds; Gold Rush (Yukon); Election of 1896; Cross of Gold; Gold v Silver standard. (End of First Sino-Japanese War, with Korea changing hands.)

1884 - 1885 - Depression of 1882 - 1885; third longest recession in past 160 years. Panic of 1884 - lasting from July 1884 - July 1885 was culmination of that recession/depression.

1873 - 1874 - *Panic of 1873* (known as Great Depression until 1930's; see 1862 - 1863 for triggering events); *Coinage Act* of 1873 (demonetizing Silver);

1862 - 1863 - Civil War, Lincoln, (End of *Civil War* led to boom in railroad construction... that led to over-expansion - similar to the housing crisis of the mid-2000's... that led to the collapse of Jay Cooke & Co., when they were unable to market millions in Northern Pacific Railway bonds in Sept. 1873... *Panic of 1873*). *IT*

The preceding list is just the tip of the iceberg, with respect to how this cycle has evolved throughout US and world history... and how events triggered in one phase often reach fruition in the next and then shift events moving forward. For example, in 1862 - 1863 - the *Civil War* and its after-effects led to a boom in railroad construction. As the pendulum swung way too far in the early-1870's (much like the housing bubble & the beginning of its bursting in 2008 - 2009), the Sept. 1873 collapse of Jay Cooke & Co. - which previously planned on constructing a second cross-country railroad (the Northern Pacific Railway) - ushered in the *Panic of 1873*, depression of 1873 - 1879 and an even longer depression in parts of Europe... that lasted ~two decades.

A few phases later, the stock market peak and reversal lower - in 1929 - 1930 - led to a decade of social struggles and the rise of Hitler and others. During the ensuing phase, in 1940 - 1941 (11 years later), the US found itself entering WWII - a decision that soon broke the stock market out of its doldrums. *There is much more...*

INSIIDE Track

“Seismic Swarm Cycles II - 2019/2020 Crescendo”

06-05-18 - *“An overlapping and corroborating 40-Year Cycle pinpointed 2019 - 2020 for the most devastating eruption(s), preceded by the quake/tsunami cycle... However, it is the synergy of MANY other cycles - colliding in 2019/2020 - that increases my confidence in that analysis”*

These preceding excerpts from the June 2018 **Seismic Swarm Cycles Report** were expounding on analysis that dates back several years before then - focusing on **2019/2020** as a potential shaky and eruptive period. For example...

02-20-14 - *“And, as just mentioned, the 2010’s hold many parallels to the 1810’s and were projected to begin with major quakes in Chile & Japan... The second, and more intense, phase of these cycles should take hold in 2018 – with Major volcano & earth disturbance cycles colliding in 2019 & 2020...”*

[2019 is also an amazing convergence of 17-Year Cycles connecting three of the largest volcanic eruptions of the past 200 years... and predicting a 4th for 2019.]... [End 02-20-14 analysis]

As explained earlier, **Jan. 2019** has powerfully reinforced this outlook and projects focus to **July 2019...** and to two other potentially shaky periods that follow.

The 90/10 Rule of Cycles

Consistent with that outlook AND with the ubiquitous *90/10 Rule of Cycles*, the frequency and intensity of seismic events are likely to accelerate as we approach the culmination and transition of that cycle.

On an intermediate basis, several articles have already explained why markets that hedge against uncertainty - like Gold & Bitcoin - are expected to see a sequence of ascending highs, with acceleration likely to lead into many/most of those peaks. The next peak is projected for **late-June/early-July** and could be another omen of related instability.

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY A PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. THE ABILITY TO WITHSTAND LOSSES OR ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE MANY OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF A SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS -- ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
