“Seismic Swarm Cycles III - January/July Cycle”

6-22-19 - *“EARTH DISTURBANCE CYCLES will take on added significance in the second half of 2019, beginning with an annual period that often sees a spike in activity (late-June - mid-July, the 180 opposite of a more significant period in late-Dec. - mid-Jan.)*

In recent months, there has been a marked increase in the frequency of moderate (5.5 - 6.5) quakes around the globe - warranting closer scrutiny as they could be building to a crescendo.”

The January/July Cycle Revisited

The preceding warning was just published in the June 22, 2019 **Weekly Re-Lay**, reinforcing a heightening focus on **July 2019** earthquake cycles and the likelihood for an imminent acceleration/intensification of these events.

That should create ‘a *crescendo*’ of activity and time another spike in seismic events.

July 2019 is one of the two annual periods, detailed and discussed for the past 10 - 20 years, when spikes in earthquakes in Japan and in the Western US are often seen. (It also incorporates adjacent sections of the *Ring of Fire* - including Alaska to Mexico & Japan to Philippines, encompassing China & Taiwan).

Already, there have been significant earthquakes in Oregon, Mexico & N. California this past weekend. On June 23, a 6.1 and 7.3 quake struck Indonesia.

On page 2 & 3, I have updated the *January/July ‘Ring of Fire’ Earth Cycle* that was printed in the Feb. 2010 **Earth in Transition 3 + 3 III Report**. The second table (1992 - 2009 - page 3) includes the original events while the first table (2010 - 2019 - page 2) adds those that have unfolded since that first table was compiled.

January ‘19 Validations

As discussed previously, **Jan. ‘19** powerfully validated that 180-degree *Jan./July Earth Disturbance Cycle*, producing a 6.0 earthquake in Alaska (1/05/19), a 6.3 quake in Japan (1/08/19), a series of three major earthquakes in Indonesia (6.6, 6.0 & 6.3 on 1/06 - 1/22/19) and a 6.7 quake in Mexico (1/20/19) ... as well as a 6.8 in Brazil on Jan. 5.

Once again, that perpetuated this uncanny cycle and projected focus to **July 2019**. That remains in the context of ongoing analysis, including the following excerpts from the June 2018 **Seismic Swarm Cycles Report**.

A few brief excerpts are included below - reinforcing the focus on this impending period.

06-05-18 - *“There is strong evidence, in my opinion, that earth disturbances ebb and flow on a cyclic basis. Yes, there are earthquakes rocking diverse regions throughout the world almost every day.*

And yes, there are always a couple dozen resurgent volcanoes around the globe... exhibiting some form of eruptive activity throughout each year. That does not change or diminish the fact that these earth disturbances tend to group into swarms of increased tectonic activity on a consistent basis...

2017 - 2020 is expected to be another with **2019 - 2020** expected to be a type of *crescendo*.”

06-05-18 - *“That earthquake/volcano sequence was expected to recur in **2018/2019** - an overarching 28-Year Cycle (detailed separately), 40-Year Cycle, ~100-Year Cycle & ~200-Year Cycle.”*

06-05-18 - *“An overlapping and corroborating 40-Year Cycle pinpointed **2019 - 2020** for the most devastating eruption(s), preceded by the quake/tsunami cycle... However, it is the synergy of*

“Seismic Swarm Cycles III - January/July Cycle”

MANY other cycles - colliding in 2019/2020 - that increases my confidence in that analysis”

03-03-19 - “...focusing on 2019/2020 as a potential shaky and eruptive period... **Jan. 2019** has powerfully reinforced this outlook and projects focus to **July 2019**... and to two other potentially shaky periods that follow.”

03-03-19 - “On an intermediate basis, several articles have already explained why markets that hedge against uncertainty - like Gold & Bitcoin - are expected to see a sequence of ascending highs, with acceleration likely to lead into many/most of those peaks.

The next peak is projected for late-June/early-July and could be another omen of related instability.”

As Earth enters this vulnerable period, markets like Gold, Silver & Bitcoin (sometimes viewed as a hedge against uncertain or destabilizing events) are fulfilling upside projections and have entered the time period when a multi-week peak is most likely.

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY A PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. THE ABILITY TO WITHSTAND LOSSES OR ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE MANY OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF A SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS -- ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
